KHUDDUS SHARIFF

Senior Backend Engineer | Java | Spring Boot | Microservices | Apache Kafka | AWS

Bengaluru, India | +91-7411312203 | khuddusshariff0022@gmail.com | linkedin.com/in/khuddus-shariff-7131b7207

PROFESSIONAL SUMMARY

Senior Backend Engineer with 4+ years of experience designing and building scalable Java and Spring Boot microservices, RESTful APIs, and event-driven systems with Apache Kafka. Currently own 5 production microservices on Intuit's QuickBooks Online Accountant (QBOA) platform, with hands-on ownership of service mesh migration, production incident response, and Jenkins CI/CD for Kubernetes deployments. Previously built core registration and identity services for MOSIP, an open-source national digital identity platform serving 500M+ users, delivering AES-256/RSA/PKI encryption workflows, Redis caching optimization, and a Java 21 modernization.

TECHNICAL SKILLS

- **Languages:** Java (primary, incl. Java 21), JavaScript, SQL
- **Frameworks & APIs:** Spring Boot, Spring Cloud, Spring Cloud Config, Spring Retry, Spring Data JPA, RESTful APIs, GraphQL, JWT, Angular
- **Architecture:** Microservices, Distributed Systems, Event-Driven Architecture, Service Mesh, Resilience Patterns (Retry, Timeout, Fallback), Optimistic Locking, Concurrency (Virtual Threads), Chaos Engineering
- **Messaging & Integration:** Apache Kafka, Apache Camel
- **Databases & Storage:** PostgreSQL, Redis (Caching), Amazon RDS, Object Storage (MinIO)
- **Cloud & DevOps:** AWS (IAM, RDS), Kubernetes, Docker, Jenkins, CI/CD Pipelines
- **Observability & Reliability:** Splunk, PagerDuty, Incident Management, Root Cause Analysis (RCA)
- **Security & Compliance:** AES-256, RSA, PKI, Data Encryption, Dependency Vulnerability Remediation, PI/PII Compliance
- **Testing:** JUnit, Mockito, Integration Testing, Gatling (Performance Testing)
- **AI-Assisted Engineering:** Claude Code, Multi-Agent Automation, Model Context Protocol (MCP)
- **Tools:** Git, GitHub Enterprise, Jira

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Backend) | Persistent Systems Ltd.

Oct 2025 – Present | Client: Intuit – QuickBooks Online Accountant (QBOA)

- Own development and production support for 5 Java/Spring Boot microservices on Intuit's QBOA platform: Matchmaking, Tier, Client Insight, Client Portfolio, and Client Orchestration.
- Delivered the Matchmaking Service, improving certification-processing efficiency by 20%.
- Led migration of the Tier Service's Identity calls to a service mesh architecture and shipped it to production; resolved a related Client Insight Service mesh configuration issue and independently verified both rollouts in Splunk across E2E and production environments.
- Resolved a production outage in an Apache Pulsar messaging client by tracing a multi-stage Spring Cloud Config failure chain to its root cause; hardened the service with resilience patterns (@Retryable/@Recover retries, fail-fast fallback) and optimistic locking to prevent recurrence.
- Led production incident response using PagerDuty, Splunk, and Slack, driving triage and root-cause analysis.
- Built and maintained Jenkins CI/CD pipelines with Gatling performance testing and debugged Kubernetes (IKS) deployment issues.
- Remediated dependency vulnerabilities across multiple services and supported PI/PII data compliance reviews involving AWS IAM and RDS.
- Built a custom multi-agent automation system with Claude Code for bug triage and verified daily status reporting, now in active use across the team.

Software Engineer | CyberPwn Technologies Pvt. Ltd.

Nov 2022 – Sep 2025 | Promoted from Junior Software Engineer | Project: MOSIP (Modular Open Source Identity Platform)

- Built and maintained core registration and identity services for MOSIP, an open-source national digital identity platform serving 500M+ users, across the Registration Processor, ID Repository, Registration Client,

Pre-Registration, and ID Authentication (IDA) modules.
- Cut API response time by ~60% (from ~2s to under 800 ms) by optimizing the Redis caching strategy.
- Modernized the Packet Manager module using Java 21 and virtual threads, increasing throughput by 30% and reducing latency.
- Implemented secure packet handling with AES-256 and RSA encryption, processing 10,000+ packets daily.
- Built Kafka producers/consumers and Apache Camel routes for event-driven communication across registration processing stages; tuned stage-wise workflows to improve system stability.
- Contributed to ID Repository services (identity data storage and lifecycle, UIN/VID generation, encrypted credential issuance) and ID Authentication services (UIN/VID, OTP, and e-KYC verification for partners), applying AES-256, RSA, and PKI security workflows.
- Maintained secure data-exchange flows integrated with Policy Management, handling 5,000+ transactions per day.
- Contributed to a Java version upgrade, maintaining backward compatibility across 25+ dependent services.
- Enhanced RESTful APIs to support multilingual notifications by integrating a language service that delivers user-preferred templates.
- Implemented Object Store (MinIO) read/write operations with in-memory encryption to ensure data integrity.
- Wrote and maintained 150+ unit and integration tests with JUnit and Mockito, achieving 90%+ test coverage.

Trainee Intern | Verzio Private Limited
Sep 2020 – Nov 2021
- Supported software development through debugging, testing, and feature contributions across ongoing projects.

PROJECTS

Kanban Project Management System
- Full-stack Kanban board application with a Spring Boot backend and an Angular frontend.
- RESTful APIs for authentication, board, and task workflows, with JWT-based role-based access control.
- PostgreSQL via JPA; backend containerized with Docker.

EDUCATION

- **Master of Computer Applications (MCA)** | Visvesvaraya Technological University (VTU), Karnataka | 2021 | CGPA: 7.9/10
- **Bachelor of Commerce (B.Com)** | Kuvempu University, Karnataka | 2018

CERTIFICATIONS

- Post Graduate Program in Full Stack Software Engineering | NIIT StackRoute

ADDITIONAL INFORMATION

- **Open Source:** Contributor to MOSIP (Modular Open Source Identity Platform)
- **Languages:** English, Hindi, Kannada, Urdu
